Introduction and Overview

College of Nursing Leadership

Mission and Values

Creighton University's College of Nursing is guided by Jesuit values that inspire students go above and beyond what is expected in order to answer the call of duty.

"Our mission is to educate compassionate leaders who transform healthcare through excellence in practice, scholarship, and service. We cultivate lifelong learners in nursing and paramedicine dedicated to a healthier world that is grounded in Jesuit values and a commitment to social justice."

"Our vision is a future where compassionate care, innovative education, and scholarly excellence converge to transform healthcare locally and globally. We strive to empower visionary leaders who advance healthcare practice, improve health outcomes, promote health equity and cultivate belonging for all."

History

College of Nursing Philosophy and Organizing Framework

Philosophy¹

The College of Nursing seeks to exemplify the mission of Creighton University, which is focused upon people as unique individuals having the potential to seek the truths and values essential to human life. A Christian learning environment in which students are assisted toward maturity as members of the human community and as scholars is fostered. In light of this Mission, and the statement of Goals and Common Objectives in the Health Sciences, the College of Nursing endorses the following statements addressing people, health, environment, learning, and nursing.

People

Each person is a unique individual made in God's image and endowed with freedom of choice, dignity, and intrinsic worth. Intellectual capability enables the person to reflect, consider, analyze, judge, and communicate. Effective abilities enhance communication through the formation of affectional bonds with the result that life is conducted in a caring, concerned way. Individuals are creative and strive for biological, psychological, social, and spiritual integration and well-being. Individual behavior is motivated by unique perceptions, needs, and goals resulting in a complex set of behaviors related to the potential for growth. A person can best be understood in the context of genetic, historic and situational influences within a society and culture. People include individuals, families, groups, and communities organized through mutual interests and directed to the achievement of common goals. Each person has a responsibility to contribute to the well-being of others.

Health

Health is defined as a dynamic multidimensional state that implies interaction with the environment. Each person perceives health differently. Nurses recognize these individual perspectives and respect their influence on health decisions. The promotion of healthy lifestyles presents nurses with challenges and opportunities to address the self-care needs of clients. Health is influenced by optimal use of one's resources to achieve maximum potential for daily living. Opportunities to optimize health potential should be available to all.

¹ Accepted October 3, 1997; Revised May 2000

Environment

The environment is defined as the circumstances, conditions, and factors that affect the existence and development of an individual, group or community. A continuous, reciprocal relationship exists between the individual and the internal and external environments. The internal environment includes physiological, psychological, emotional, intellectual, and spiritual components. The external environment includes physical, societal, and cultural components. These environmental components also exist within, and influence families, groups, and communities.

Learning

Learning is an active, life-long internal process based on need, motivation, and opportunity. Learning is demonstrated by cognitive, affective, and psychomotor changes. Motivation is enhanced when goals are mutually established and when individual cognitive styles are understood and addressed. Learning is fostered by organized instruction and role modeling followed by opportunity for application, evaluation, and feedback. The learning climate fosters ongoing scholarly activities and provides an environment where students and faculty are encouraged to discover and develop their potential. Experiences that promote critical thinking are provided. Critical thinking provides the foundation for making personal, clinical, and other professional decisions. Critical thinking is used in understanding, investigating, and synthesizing the implications of social, professional, and health care issues. Formal education in this College of Nursing provides a foundation for beginning and advanced practice that focuses on care management and health outcomes.

Nursing

The focus of nursing is to promote, maintain, or restore health and provide comfort and dignity in life and death. The roles appropriate for the practice of nursing are interdisciplinary, multidimensional, and interrelated. These roles include but are not limited to care provider, care manager, critical thinker, communicator, change agent, and educator. The discipline of nursing embodies a knowledge base that is evolving. Professional nursing contributes to and uses professional, legal, and ethical standards of practice. Emerging patterns of care and roles in nursing develop as research is conducted, disseminated, and fully integrated within all practice settings.

Organizing Framework²

The curriculum of the College of Nursing is developed within an organizing framework (see Figure 1) that exemplifies the faculty's beliefs related to professional nursing. The organizing framework is intended to assist the faculty in structuring the curriculum and to assist students in developing a systematic method to guide their professional growth both in the immediate and distant future.

The faculty believes that the major concepts essential to professional nursing practice are those that relate to people, health, environment, learning, and nursing.

The faculty believes the nurse must also possess specific knowledge of and the ability to critically think about factors that influence a person's positive interaction with the environment. These factors are: communication, health states, care management, and personal and professional development.

The preceding factors are organized into vertical and horizontal strands. A vertical strand gains both depth and breadth in its application to nursing as the student progresses through the program. Theories and principles are added as the complexity of nursing interventions increases. A horizontal strand offers all elements in its initial introduction and gains breadth in its application in various settings. According to these definitions, critical thinking is accepted as a horizontal strand whereas communication, health states, care management, and personal and professional development are classified as vertical strands. Program objectives reflect the philosophy and the organizing framework. The program objectives guide course development and the selection of learning experiences.

² Approved: August 16, 1996; Revised: May 2000; Reviewed: November 19, 2004

Communication

Communication is a process that is dynamic, complex, irreversible, and inevitable. Communication involves a sender, a receiver, and a message. The process of communication involves integration of meaning, which occurs in a cultural, developmental, and environmental context. In professional nursing there are two significant goal-directed communication processes: therapeutic and professional. Therapeutic communication includes relationship building, helping skills, and education. Professional communication includes both intra/interdisciplinary communication such as collaboration, consultation, coordination, documentation, advocacy, conflict resolution, evaluation, assertiveness, and scholarly communication.

Care Management³

Care management is a client-centered and intra- and interdisciplinary process to enhance health states, functional abilities, and quality of life for individuals, families, and populations. The focus of nursing care management is to assess health states and plan, provide, negotiate, coordinate, and evaluate options and services to achieve quality, cost-effective outcomes. The care management process occurs in a climate of partnership with individuals, families, groups, communities, providers, and payers. In this partnership, nurses as care managers serve as change agents and advocates for outcomes improvement by seeking solutions that empower clients to promote, protect, restore, and maintain health.

Health Promotion

Proactive strategies that optimize physical, social, and emotional health and well-being of individuals, families, and communities. Health promotion activities enhance the quality of life throughout the lifespan and are initiated at both personal and public levels.

Health Protection

Strategies to safeguard physical, social, and emotional health and well-being of individuals, families, and communities from specific and identified potential risks. Health protection activities are enacted at both personal and public levels.

Health Restoration

Diagnosis and interventions directed to returning individuals, families, and communities to a pre-acute illness or pre-crisis state and/or optimal level of functioning. Health restoration activities are targeted to early identification and timely management of existing health alterations with the goal of restoring the individuals, families, and communities to an optimal level of function.

Health Maintenance

Comprehensive, coordinated interventions to support optimal levels of functioning and quality of life in populations who require ongoing surveillance.

Disease Management

A model to manage the care of individuals and/or populations experiencing disease. Emphasis is placed on understanding the natural course of a disease in order to coordinate comprehensive interventions designed to protect, restore, and maintain health.

Episodic Health Alteration

An alteration in health lasting a discrete period of time, during which individuals are consistently within the symptomatic range to meet diagnostic criteria of a particular illness or syndrome.

Chronic Health Alteration

³ Accepted by Care Management Teams: February 3, 1998; Revised: March 20, 1998; October 4, 2004

A constant and prolonged alteration in health that shows variability in the presence and severity of symptoms and level of functioning.

Vulnerable Populations

Designates groups of people who are in a state of defenselessness, fragility, risk, or susceptibility to illness or injury. Vulnerability stems from variables or risk factors which increase the probability of developing disease, injury, or a lower level of functioning. The risk factors may be biological, behavioral, sociocultural, economic, and/or environmental in nature.

Outcomes

Measurable changes in health states of individuals, families, communities, and populations as a result of the care management process. Outcomes can be described both quantitatively and qualitatively.

Social Justice

As faculty and students in a Jesuit University College of Nursing, we are taught to put our faith and teaching into practice in everyday life. This calls us to awareness of problems of poverty and discrimination and commits us to educate others and advocate for the health and well-being of those clients and communities who cannot do so for themselves. Social Justice includes direct efforts on behalf of individuals and communities in need and/or provision of non-violent witness against threats to peace and justice.

Health States

Health is a multidimensional dynamic state that contributes to and is influenced by the full range of life experiences. The framework for studying the wide range of health states is based upon knowledge from nursing and other disciplines. The factors that influence health states are also studied in this framework with the goals of thinking creatively about and investigating ways in which the nurse can positively influence health states of people.

Personal and Professional Development

Development is a lifelong process by which a person's potential is challenged. Activities, often referred to as developmental tasks, ordinarily arise at certain times in the lifespan and impact health. Successful achievement of these developmental tasks facilitates subsequent growth. Self-awareness, values consciousness, and accountability are critical to the process of professional development. Personal growth enhances the nurse's ability to provide professional nursing care.

Critical Thinking

Critical thinking is the process of purposeful, self-regulatory judgment that includes the cognitive skills of interpretation, analysis, evaluation, inference, explanation, and self-regulation.⁴

Figure 1: College of Nursing Curriculum Organizing Framework

⁴ Facione, P.A. (1990). Critical thinking: a statement of expert consensus for purposes of educational assessment and instruction. Millbrae, CA: The California Academic Press.

Admission Requirements and Conditions of Enrollment

[DNP Admission Requirements and Conditions of Enrollment](#)

[MSN Admission Requirements and Conditions of Enrollment](#)

[APRN Post Graduate Certificates Admission Requirements and Conditions of Enrollment](#)

Academic Planning

Advising

An academic advising meeting should occur each semester to complete pre-registration for the upcoming term. This meeting will also provide for a review of the program of study with the student. Any revisions to the plan of study will be noted in Creighton Connect. An unofficial transcript and degree audit are available in Degree Works.

Registration for courses should be completed only after meeting with the faculty advisor. The academic advisement meeting is for the student's benefit, to avoid changes that could present problems in terms of progression, (i.e., lack of knowledge about sequencing patterns and when courses are offered). Registration for courses without appropriate advisor approval can result in an administrative withdrawal from classes.

For graduate students, 8 credits at the graduate level are considered full time status and 3 credits is considered part time status.

Absent Student Course Cancellation Procedure for Online Courses

Students enrolled in online courses who do not participate in the online course by ten (10) days after the course start will be administratively cancelled out of the course. Participation is defined as posting on a discussion board, submitting an assignment, or communicating with the instructor via course or Creighton University email. If a student is administratively cancelled out of a course for reasons of non-participation, the student will not be allowed to re-enroll in the course during that term.

Refunds, Overpayments, and Withdrawals

Adjustments and Withdrawals after Registration

Changes in registration (dropping or adding courses) must be approved by the student's advisor. After the Add and Drop deadlines, you may change your schedule (i.e. drop or withdraw from individual courses) by following the directions on the Registrar's [website](#).

When you withdraw from a course, you receive a grade of "W" for that course.

Continuous Enrollment

All enrolled students pursuing graduate degrees at Creighton University must maintain continuous enrollment from matriculation until completion of all degree requirements. Continuous enrollment is defined as registering for a minimum of three credits in at least two semesters per academic year (Fall, Spring, Summer) until the degree is attained, or status as a degree-seeking student is terminated. Students who find that they will not be enrolled for two semesters must request a Temporary Withdrawal. An exception may be granted for military students who are being deployed, provided they have communicated this information to their program director.

Temporary Withdrawal

Transfer Between Tracks or Programs

A change in clinical track may require additional supervised clinical hours. A transfer between any graduate tracks or programs requires the following:

1. Student contacts the Academic Coach or current Advisor indicating intention to change specialty tracks and or degree program.
2. Academic Coach provides the student with the online form to complete and connects them to the track leader for their requested specialty track and/or degree program.
3. Academic Coach sends the completed form to the requested specialty track leader for scheduling an informational meeting. This meeting must be completed prior to the request being submitted to the A&P committee.
4. The requested specialty track leader will inform the Academic Coach of the completed meeting and request the student's formal review by the A&P committee.
5. Notification to the student of formal decision:
 1. Specialty track change: chair of the A&P committee
 2. Degree program change: Assistant Dean of Student Affairs
- 6.. A new program of study will be signed by the student.

Transfer Credit

Developing a Plan of Study

When students are admitted to a graduate program within the College of Nursing, an academic advisor is assigned. A Program of Study lists all the required courses for the student's track divided into the following categories: Research/Theory Core Courses, Leadership/Policy Core Courses, Role Support Courses, and Role Specialty Courses. Students and their advisors should construct a Plan of Study, from the listing of courses on the Program of Study, during the first semester of enrollment, which will list the following:

1. Courses required for removal of undergraduate deficiencies (deadline dates, as appropriate).
2. Courses taken prior to submitting the Plan of Study, that apply to the minimum credit requirement.
3. Courses required by the degree program and projected timeline.
4. Elective courses (or course options) that may be applied to the minimum credit requirements.
5. Courses taken outside the degree program (if appropriate).

Students should be aware that deviations from the original Plan of Study may result in a delay in completing the program. The College of Nursing reserves the right to modify the program of study based on curriculum revisions.

APRN Post Graduate Certificate and Post Graduate DNP Students

A gap analysis is required for APRN Post Graduate Certificate and Post Graduate DNP Programs . A gap analysis is completed to determine completed practicum hours and previous required courses. The program of study will be developed after completion of the gap analysis.

Annual Verification

Student Health Education and Compliance (SHEC) will contact students via Creighton email notifications on an on-going basis to ensure currency of specific health-care related requirements (e.g., PPE, immunizations, BLS certification) and/or other clinical agency requirements (e.g., HIPAA) necessary to continue practice in the clinical agencies. Students not current in their requirements are subject to removal from the clinical agency until the requirements are met. Students should note that removal from clinical could delay academic progression.

Students will verify they meet the following requirements annually: They have access to the Handbook in electronic form, and they will abide by the policies and procedures in the Handbook by signing the "Undergraduate Handbook Acknowledgement and Signature Sheet, available in BRIDGE. BRIDGE and Creighton Learning modules are available via: <https://learning.creighton.edu>.

- A. The "Safety and Technical Standards" form is required to validate the student's ability to meet the cognitive, affective, and psychomotor requirements of the curriculum, with or without reasonable accommodations, consistent with the Americans with Disabilities Act.
- B. Students will sign the following statement. "I agree to notify the College of Nursing within 30 days of being charged with crime, felony, misdemeanor, or other offense; and any convictions, guilty pleas or no contest pleas to any crime, felony, misdemeanor or other offense which occurs during my enrollment in the College (any such occurrence is called an "Offense"). I understand any such Offense may subject me to disciplinary action by the College, with possible consequences up to and including dismissal from the College. I also understand that if I fail to provide the College of Nursing with information about an Offense, such failure to report could subject me to disciplinary action by the College, with possible consequences up to and including dismissal from the College."

Notification Contact:

College of Nursing Dean's Office

Criss II 184, 402-280-2000

constudents@creighton.edu

- C. Prior to the semester that the student enters the first clinical course, and annually thereafter, the student must complete all required general orientation modules and the agency specific modules.

Student Rights and Responsibilities

Each student is personally responsible for completing all requirements established for the degree by the University and the College of Nursing. It is the student's responsibility to inform oneself of these requirements. A student's advisor may not assume these responsibilities and may not substitute, waive, or exempt the student from any established requirement or academic standard. The University reserves the right to modify requirements at any time. Although the University encourages the widest amount of student responsibility, with a minimum of administrative regulation, it expects each student to maintain appropriate standards in his or her academic and personal life. The University reserves the right to terminate the registration of any student who does not meet the standards acceptable to the University.

Classwork and Clinical Attendance

Student participation is imperative to learning. Graduate students are expected to attend all lectures, clinical, and laboratory sessions except as excused by the faculty. Certain activities are mandatory and cannot be made up (e.g. competency check-outs, procedures days). Inability to attend these mandatory activities will delay the student's progress through the curriculum. Students are to notify the appropriate faculty member and/or agency if they are unable to attend. Students with excessive absences are subject to Absence Failure (AF).

1. Guidelines for reporting absences from a class/clinical experience are specified in each course syllabus.
2. Anticipated absences should be discussed with the course leader(s) at the beginning of the semester so that planning missed class/clinical experiences can be completed well in advance.
3. In the event of absence from a clinical experience, faculty may request medical verification of illness.
4. Consequences of habitual tardiness and/or excused absences will be determined by the course attendance policy. Repeated unexcused absences may result in failure.
5. It is the student's responsibility to make arrangements for missed classroom/ clinical time, assignments, and activities.
6. Attendance is mandatory at the scheduled exam times.

Academic Honesty and Misconduct

In keeping with its mission, the University seeks to prepare its students to be knowledgeable, forthright, and honest. It expects and requires academic honesty from all members of the University community. Academic honesty includes adherence to guidelines established by the University, its Colleges and Schools and their faculties, its libraries, and the computer center.

No-Go States

Due to regulatory requirements in the states listed below, we are unable to accept or enroll students who intend to reside in any of these states while pursuing a graduate nursing degree:

- Delaware, Louisiana, Maryland, Massachusetts, New Hampshire, New York, Tennessee.
- DNP students residing in the state of Washington or intending to pursue clinicals in that state may only enroll in the following DNP tracks: Family Nurse Practitioner, Neonatal Nurse Practitioner, or Pediatric Primary and Acute Care Nurse Practitioner.

Assistance with Clinical Site Placement

Clinical site placement and identification of a qualified preceptor is primarily the responsibility of the student; however, the College of Nursing will provide assistance in securing a clinical site and preceptor when needed. Although faculty and staff will make every effort to identify sites for precepted rotations as close to the student's place of residence as possible, statutory regulations, requirements of health care provider sites, competition for sites, etc., may limit the location and selection of sites. Students may be required to travel out of state for clinicals. When a clinical site and preceptor is assigned by the College of Nursing, the student enters into a contractual agreement to complete the arranged clinical hours at the site. Expenses including travel, lodging, food, Portal fees, licensing, parking, background checks, drug screens, etc. are the responsibility of the student.

Moving to a different state is not recommended during a student's program of study. Relocation to a state in which the School of Nursing is not authorized to operate will make it impossible to secure clinical placements within the new state. Although every effort will be made to work with students relocating to these areas, it may either delay or make it impossible to find a site in proximity to the new place of residence. Information regarding the states in which the College of Nursing is authorized to operate is available on the School of Nursing website. This information is subject to change without notice due to regulatory or legislative enactments.

There are multiple clinical practicum compliance requirements that must be completed prior to starting your clinical experience. Failure to meet these requirements will result in suspension from classroom, clinical, and lab sessions or may result in course failure, which could result in dismissal from the program. Students must also meet any additional requirements of the practicum experience agency. These may vary by agency.

Payment for Clinical Sites or Preceptors

Students are encouraged to utilize clinical sites and preceptors that do not charge fees for clinical placement. Any fees associated with completing practicum hours at a site, or with a preceptor, are the responsibility of the student.

Evaluation of Students

Students are notified of their academic progress on a regular basis. Instructors are responsible for keeping anecdotal records of all conferences informing students of their progress. Written evaluations of student's clinical performance are prepared at the completion of each clinical course rotation and are reviewed and available in eValue. Evaluations are based on the achievement of specified clinical objectives. Final evaluations are to be discussed and electronically reviewed and marked as reviewed by students and faculty. Any concerns about scores or comments are to be discussed with the student.

Professional Conduct Policies

The educational process at Creighton University is founded on Christian ideals and is committed to intellectual growth and the search for truth, and to the development of such attributes as integrity, human dignity, and concern for others. The Creighton University community is based on a Catholic Jesuit tradition and is committed to supporting the intrinsic value of each human being. This tradition involves striving to create a human community influenced by the laws of justice and love, complete with respect and concern for all persons as children of God. The Creighton University community is dedicated to the promotion of values consistent with personal and academic excellence. Choosing to join this community, whether as student, faculty or staff, obligates one to act in a manner that is consistent with these commitments. Joining the Creighton University community evidences acceptance of these commitments and agreement to strive for their achievement.

Creighton University Student Handbook and Office of Community Standards and Wellbeing

The [Creighton University Student Handbook](#) describes disciplinary procedures and penalties, which may include suspension or expulsion from the University.

Creighton Student Organizations and Activities

Standards of Conduct

Commitment to living by these principles means that one will endeavor to:

1. Act with professional, academic, and personal integrity.
2. Respect and promote the dignity of all persons.
3. Respect the policies of the Creighton University community and the rights of its members both on and off campus, as well as the just laws of the civic community and the rights of its members.
4. Support the personal, professional, academic, and vocational development of the members of the Creighton University Community.

If a student demonstrates disruptive behavior during class time, faculty may ask the student to leave the classroom. Should this occur, the student will not be allowed to return the next hour of class. Disruptive behavior includes, but is not limited to, talking, text messaging, excessive sleeping, and use of cell phones

Creighton University Office of Title IX and Civil Rights Compliance

Code of Ethics for Nurses⁵

The Creighton University College of Nursing adheres to the American Nursing Association's Code of Ethics:

⁵ American Nurses Association. (2025). Guide to the Code of Ethics for Nurses. Washington, DC.

1. The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.
2. A nurse's primary commitment is to the recipient(s) of nursing care, whether an individual, family, group, community, or population.
3. The nurse establishes a trusting relationship and advocates for the rights, health, and safety of recipient(s) of nursing care.
4. Nurses have authority over nursing practice and are responsible and accountable for their practice consistent with their obligations to promote health, prevent illness, and provide optimal care.
5. The nurse has moral duties to self as a person of inherent dignity and worth including an expectation of a safe place to work that fosters flourishing, authenticity of self at work, and self-respect through integrity and professional competence.
6. Nurses, through individual and collective effort, establish, maintain, and improve the ethical environment of the work setting that affects nursing care and the well-being of nurses.
7. Nurses advance the profession through multiple approaches to knowledge development, professional standards, and the generation of policies for nursing, health, and social concerns.
8. Nurses build collaborative relationships and networks with nurses, other healthcare and non-healthcare disciplines, and the public to achieve greater ends.
9. Nurses and their professional organizations work to enact resource practices, eliminate health inequities, and facilitate human flourishing.
10. Nursing, through organizations and associations, participates in the global nursing and health community to promote human and environmental health, well-being, and flourishing.

Social Media and Communication Policies

Creighton University College of Nursing abides by the [Creighton University Social Media Statement](#)

In addition, the College of Nursing recognizes that social media are an important and timely means of communication.

Social Media

Confidentiality of Classroom, Clinical, & Electronic Communications

Information that is discussed in the classroom or on web-based assignments should be viewed as confidential and should not be shared with anyone not enrolled in the class.

Clinical practicum information is considered confidential. The Health Insurance Portability and Accountability Act (HIPAA) require that health care professionals and students respect confidentiality of patient health information.

Students must adhere to the following rules regarding patient records in any clinical course at any facility:

- A. Regardless of the format (paper, electronic, verbal) and no matter how socially benign, patient information is protected under federal law. It is the duty of the student to protect the confidentiality of patient information by keeping that information reasonably secure;
- B. Patient information may never be accessed for inappropriate use;
- C. Students may not grant access to or divulge patient information to anyone who is otherwise not authorized to have it;
- D. Reasonable security for paper includes keeping it in a reasonably secure location, whether at home or in a clinical site. It is NOT reasonable to leave papers unattended at a workstation, the nurses' station, or anywhere else;
- E. Reasonable security for electronic items includes encryption of files or machines and controlling the physical custody of those files and machines (e.g., do not leave your PDA unattended);
- F. Reasonable security for verbal items includes having conversations only with the care team and others in the academic program or class. It also includes having those conversations in a relatively secure location (e.g., not in elevators, public areas, cafeterias);
- G. Reasonable security also includes shredding of paper and "cleaning" for electronic records when your program needs for that information ends.

Failure to comply with HIPAA regulations and/or failure to maintain confidentiality is considered academic misconduct and is subject to the College's policies and procedures related to academic misconduct. If a student fails to follow clinical agency policies, the clinical agency may deny that student and other students have the right to participate in clinical practicum experiences at that site.

Student Governance

Students' contributions are important to the overall governance of the College. Students are crucial to the formulation and revision of policies that govern the college. Student input is valued, and provision is made for student participation on most College of Nursing committees. Students are encouraged to volunteer as representatives on these committees.

Student Involvement in Curriculum Evaluation

Creighton University's College of Nursing is committed to the continuous quality improvement of its curriculum. The College seeks input from students in order to continually assess course effectiveness as well as the quality of the College's faculty and instruction. Provision will be made for anonymity of responses. Faculty use this information for formative evaluation and modification of the course and learning strategies. Results from all evaluations are taken seriously and incorporated into improving course offerings and teaching as well as informing overall curricular and programmatic decisions.

A representative sample of student evaluations is also used by faculty in their own self-evaluation and in preparing dossiers for promotion and tenure.

Students are provided with multiple evaluation opportunities including but not limited to opportunities to evaluate:

1. Course effectiveness
2. Quality of faculty instruction
3. Classroom resources
4. Clinical resources
5. Overall satisfaction with their experience as a student at Creighton University

The College of Nursing will conduct online course and faculty surveys. An opportunity for evaluation is provided for each course and at the completion of the program.

Communication Protocols

Lines of Authority and Communication

Lines of authority/communication are delineated below according to academic or non-academic concerns.

1. If an academic question or problem arises, the student should pursue the matter in the following sequence:
 - a. Individual faculty member and/or the student's faculty advisor who can serve as a student advocate, if warranted
 - b. Instructor of Record
 - c. Associate Dean, Graduate Program
 - d. Senior Associate Dean for Academics
 - e. Dean of the College of Nursing
2. If a non-academic question or problem arises, the student should pursue the matter in the following sequence:
 - a. The student's faculty advisor
 - b. Associate Dean, Graduate Program
 - c. Assistant Dean for Academic and Student Affairs
 - d. Senior Associate Dean for Academics
 - e. Dean of the College of Nursing

[Online Reporting Form - Office of Equity and Inclusion](#)

[Formal Complaint Policy](#)

Confidentiality / Privacy (FERPA)

Information about students or former students will not be released without the consent of the student other than in the exceptions stated in the Federal Act. Students have the option to grant permission to specific individuals regarding academic information, financial information, and Release for Parents/Guardians/Spouses/Others: Academic & Behavior through their Creighton NEST account.

E-Mail Accounts/Listserv

Students are required to have and regularly use a Creighton University e-mail account and will be placed on the College of Nursing listserv. The listserv is the official means for College of Nursing communication with students.

Student Resources

All resources are on the main campus unless otherwise noted

[University Academic Calendars](#)

Insurance Information

[Student Health Insurance](#)

Health insurance is required of all students. A complete announcement of the insurance plan is sent to each student and prospective student.

[Professional Liability Insurance](#)

All nursing students in clinical courses are required to be covered by professional liability or malpractice insurance. To facilitate adequate coverage at reasonable rates, this insurance is provided through the College of Nursing. The premium is included in the course or lab academic program fee.

[Motor Vehicle Insurance](#)

Nebraska regulations require that insurance coverage for a vehicle must be retained by the vehicle owner. Initial insurance claims on the vehicle are always made to the owner's insurance policy. The University cannot be responsible for damage to a student's vehicle while the vehicle is in use for student learning experiences. Since the student must look to personal auto insurance coverage if an accident occurs, it is important that adequate limits of personal liability and physical damage coverage be maintained on your vehicle.

[Student Employment](#)

While students may be engaged in part-time employment, the College of Nursing is under no obligation to adjust class times and clinical experiences, exams, etc. to accommodate students' work schedules.

Additional Graduate Student Resources

Graduation Preparation

[Application for Degree](#)

[Commencement](#)

[Pinning and Hooding Ceremony](#)

At the completion of every semester a graduation ceremony is conducted. This ceremony is an opportunity for the College of Nursing graduates to celebrate their achievements with classmates, family, faculty, and staff. Student awards are presented at the ceremony. Depending on the program completed, students are honored with a College of Nursing pin and/or a hood representing their accomplishment.

Non-discrimination Policy

It is the admission policy of Creighton University to accept qualified students within the limits of its resources and facilities. Creighton admits qualified students and hires qualified employees without regard to race, color, national or ethnic origin, handicap, sex, religion, or status as a disabled veteran or veteran of the Vietnam era. Its education and employment policies, scholarship and loan programs, and other programs and activities, are administered without any such discrimination. The University's Office of Equity and Inclusion has been delegated the responsibility for coordination of the University's Equal Rights effort

Certification Exams and State Licensure Requirements

Prior to graduation in some tracks, students will be required to take a pre-certification exam (\$50-\$100) to assist with preparation for the certification exam following graduation.

Upon completion of the respective program option, graduate nursing students are eligible to take a certification exam. Certification exams are national standardized exams that are prepared and offered by a variety of professional organizations. For some students, there may be an option of more than one certifying exam. Information and application forms will be posted in the appropriate Residency course, as it is the final clinical course. Faculty and administration will facilitate the student's process of applying to sit for the certifying exam. However, it is the student's responsibility to know the required information and ensure that an application is completed and submitted.

Graduates who complete the Adult-Gerontology Acute Care NP (ACNP) program meet eligibility for national certification through the American Association of Critical-Care Nurses (AACN) and the American Nurses Credentialing Center (ANCC).

Graduates who complete the Pediatric Acute Care NP program meet eligibility for national certification through the Pediatric Nurse Credentialing Board (PNCB).

Graduates who complete the Pediatric Dual Track (Acute/Primary Care NP) program meet eligibility for national certification through the Pediatric Nurse Credentialing Board (PNCB) for both the acute and the primary care certifications.

Graduates who complete the Neonatal NP program meet eligibility for national certification through the National Certification Corporation (NCC).

Graduates who complete the Family NP program meet eligibility for national certification through the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Program (AANPCP).

Graduates who complete the Psychiatric Mental Health NP program meet eligibility for national certification through the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Program (AANPCP).

All the above national certification credentialing agencies are accepted in all 50 states as the initial step in seeking licensure as an Advanced Practice Registered Nurse (APRN).

In addition, graduates of the Nursing Education track and Nursing Education Post Graduate Certificate are eligible candidates for the Certified Nurse Educator (CNE®) exam, which is administered through the National League for Nursing (NLN)

BSN - DNP Tracks (from: https://catalog.creighton.edu/graduate/graduate-programs-courses/nursing/doctor-nursing-practice-dnp/#degreerequirementstext?field_program_page_class_target_id=3)

- **Adult-Gerontology Acute Care Nurse Practitioner** - manages the care of individuals in acute care settings. Graduates who complete the Adult-Gerontology Acute Care NP program meet eligibility for national certification through the American Association of Critical-Care Nurses (AACN) and the American Nurses Credentialing Center (ANCC).
- **Family Nurse Practitioner** - manages care throughout the lifespan of individuals and families. Graduates who complete the Family NP program meet eligibility for national certification through the American Nurses

Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Program (AANPCP).

- **Neonatal Nurse Practitioner** - manages care for newborns in all levels of neonatal intensive care units. Graduates who complete the Neonatal NP program meet eligibility for national certification through the National Certification Corporation (NCC).
- **Pediatric Primary and Acute Care Nurse Practitioner (Dual)** - manages the care of pediatric patients across the entire continuum of health from wellness to critical care. Graduates who complete the Pediatric Dual track NP program are eligible to take the primary and acute care national certification exams through the Pediatric Nurse Certification Board (PNCB).
- **Psychiatric/Mental Health Nurse Practitioner** - manages care throughout the lifespan of diverse populations and can practice within both acute and primary care settings. Graduates who complete the Psychiatric Mental Health NP Program meet eligibility for national certification through the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Program (AANPCP).
- **Nursing Administration & Leadership** - prepares nurses as innovative and collaborative leaders in diverse health care settings, corporations and consulting firms, improving the quality of healthcare.

The Doctor of Nursing Program at Creighton University is accredited by the Commission on Collegiate Nursing Education (CCNE) (<http://www.ccneaccreditation.org>).

College of Nursing Graduate Student Handbook

The University reserves the right to change and to make exceptions to the provisions of this handbook at any time and to apply any change or to make an exception applicable to any student without regard to date of admission application or date of enrollment. This handbook is neither a contract nor an offer to enter into a contract. As a graduate student in the Doctor of Nursing Practice Program at Creighton University, you are responsible for being familiar with policies and procedures of the University and College of Nursing. This handbook supersedes previous editions. Please refer to the Creighton University Graduate Catalog for all general information regarding Creighton University.

The Catalog is available on the Web at <http://www.creighton.edu/registrar/catalogs/>.

Graduate students also abide by the policies in the *Creighton University Student Handbook* which is available at: <https://studentlife.creighton.edu/community/student-handbook>

An electronic version of this handbook is available on the College of Nursing website at <https://nursing.creighton.edu/about>. In the event of difference between a printed edition and the current online edition, (<https://nursing.creighton.edu/about>), the online edition will supersede the printed edition.

The baccalaureate degree in nursing, master degree in nursing, doctor of nursing practice, and post-graduate APRN certificate at Creighton University are accredited by the Commission on Collegiate Nursing Education <http://www.ccneaccreditation.org/>
